

RISHABH SINGH

Aspiring React.js / Front-End Developer

Ahmedabad, Gujarat | 07984244095 | rishabhsingh12345678910@gmail.com | [linkedin.com/in/rishabh-singh-260462254](https://www.linkedin.com/in/rishabh-singh-260462254)

CAREER OBJECTIVE

BCA graduate with a strong foundation in programming and hands-on experience building React.js applications through academic and self-driven projects. Comfortable working with component-based architecture, state management, and core JavaScript concepts, with a growing interest in full-stack (MERN) development. Looking to start my career as a Software Developer / Front-End Developer where I can apply my problem-solving skills, continue learning modern web technologies, and contribute effectively to a development team.

EDUCATIONAL DETAILS

React JS Training 10-4-2026 - Present

Tops Technologies, Ahmedabad

Bachelor of Computer Applications (BCA) — Computer Applications Development 07/2023

SSR College of Arts, Commerce and Science, Silvassa

12th (Higher Secondary) 2022

Machi Mahajan School

10th (Secondary School) 2020

Holy Trinity Higher Secondary School

SKILLS

Technical Skills

- Programming Languages: JavaScript, Python, C++, Java
- Web Development: HTML, CSS, React.js, Bootstrap, Front-End Development
- Database: SQL
- Core Concepts: Object-Oriented Programming (OOPs), Problem Solving, Component-Based Development, State Management, Event Handling, Conditional Rendering
- React.js Fundamentals: useState Hook, Props, Reusable Components, Conditional Rendering

Languages Known

- Hindi, English, Gujarati

Soft Skills

- Quick Learner — able to pick up new frameworks and tools independently, as shown by self-directed practice alongside formal React.js training.
- Problem-Solving Mindset — comfortable breaking down application requirements into components and logical states before implementation.
- Attention to Detail — focused on writing clean, readable code and testing functionality (e.g., quiz scoring logic) before considering a feature complete.
- Team Collaboration — experience coordinating with peers during college activities and event organising, translating into good communication for team-based development work.
- Adaptability — open to working across the front end today with a clear intent to grow into full-stack (MERN) development.

EXPERIENCE

Fresher — Practical, project-based experience in React.js and front-end development gained through structured training and self-initiated projects, demonstrating readiness for a junior developer role.

PROJECTS

Quizton — React.js Quiz Application *Personal Project*

- Built a fully functional quiz application in React.js that allows users to enter their name, answer a sequence of questions, and view a final score with a result category based on performance.
- Designed the application using reusable, component-based architecture, breaking the UI into independent components for the start screen, question display, answer options, and results summary.
- Implemented dynamic state management using the useState Hook to track the current question index, selected answers, running score, and quiz completion status in real time.
- Used props to pass question data and event handlers between parent and child components, keeping the component tree organized and maintainable.
- Applied conditional rendering to control the flow between the welcome screen, active quiz screen, and results screen based on the application's state.
- Added event handling for answer selection, question navigation, and a quiz-restart feature, allowing users to retake the quiz without reloading the page.

INTERESTS

Travelling | Event Organising | Gaming

DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge and belief.
